About Me

Turning Data Into Decisions That Drive Results

I'm a data analyst passionate about turning raw data into meaningful insights that drive smarter decisions. With just over a year of experience and over 50 projects completed; I enjoy exploring data, uncovering patterns, and building clear, interactive dashboards that make complex information easier to understand.

I believe great analysis goes beyond numbers it's about finding the story they tell and the opportunities they reveal.

My Skills

The tools I use to clean, analyze, and transform raw data into meaningful insights and actionable business intelligence.

Microsoft Excel

SQL Server

Power BI

My Services

I help businesses make sense of their data by finding useful insights, creating clear dashboards, and turning numbers into information they can actually use to make better decisions.

Data Cleaning & Preparation

Transform raw, inconsistent data into accurate, structured, and analysis-ready datasets by handling missing values, duplicates, and formatting issues.

Data Analysis & Insights

Explore datasets using Excel and SQL to identify trends, uncover patterns, answer business questions, and reveal opportunities for improvement.

Dashboard Development & Data Visualization

Build interactive Power BI dashboards that turn complex data into clear visual reports, helping stakeholders monitor performance and make informed decisions.

Business Intelligence & Reporting

Translate analytical findings into meaningful reports, actionable recommendations, and performance metrics that support strategic business decisions.

My Projects

View All Projects

A look at some of my recent work, where I've used Excel, Power BI, and SQL to explore data, uncover useful insights, and turn numbers into clear, meaningful stories.

Logistics Data Analysis & Dashboard Development

Power BI · Data Cleaning · Data Visualization

Cleaned and transformed logistics data, built interactive dashboards, and uncovered insights into customers, truck performance, fuel usage, and drivers to support better operational decisions.
